'Bring the Boys Home'

CHIPPEWA FALLS—Quite a few magazines and publications are advocating that we cease our aggression in S. E. Asia and as Sen. Morse suggests, "bring the boys home."

The Christian Century for June 3 states, "The only young Alexander who can cut the Gordian knot in S. E. Asia is the U.N."

The Century might have added that Uncle Sam hesitates to take the S. E. Asian problem to the UN for fear the UN might turn thumbs down on our private war of aggression.

Our "invisible government" the CIA, so termed by Look Magazine, June 16 issue, in a scathing condemnation of the CIA, states:

"This shadow government is shaping the lives of 190,000,000 Americans. Major decisions involving peace or war are taking place out of public view. The intelligence network has grown into a massive, hidden apparatus that secretly employs about 200,000 people and spends several billion dollars a year. Because of its enormous size and pervading secrecy, the Invisible Government has become the inevitable target of suspicion and criticism. It has been accused by influential citizens of conducting a foreign policy of its own and meddling deeply in the affairs of other countries without presidential authority."—V. P. Mock.
